

Team a: Ferdinand van Walree(3874389) & Matthew Swart (5597250)

We graded our self with a 9.

- 1-3: 7 points
- Task 4 – 1.25 points
 - o Bool/List: Correct (.5)
 - o If: Correct (.5)
 - o Recursion: partially correct. (.25)

The "take" function provided in the assignment pdf does not work, however the recursion function sum works. Unfortunately, we are not sure when it works. So, it is partially working.
 - o Laziness: Not implemented
- Additionally, we added a .75 to our grade, because we think our code is readable and we added documentation.

So, in conclusion we graded our self with a 9.
